PROFILE

I'm a web designer and server administrator with a strong foundation in graphic design. My academic background includes a Diploma in Information Technology, a Diploma in Computer Engineering, and a Bachelor's Degree in Information Technology.

Since 2016, I've been working as a freelance graphic designer, and I expanded into web design in 2019. In 2021, I joined the University of Energy and Natural Resources, where I design and manage websites for various schools and centers while handling web server administration. Over the years, I've a lot of websites for individuals and businesses, working with tools like WordPress, Photoshop, and Figma. I also develop custom solutions using PHP, JavaScript, HTML, and Python, and I'm comfortable with the full Microsoft Office Suite.

What I'm most proud of is creating websites that not only look good but actually work well for clients. The positive feedback I've received and the contribution I've made to enhancing the digital presence of UENR and other organizations have been particularly rewarding.

PERSONAL STRENGTHS

I bring creativity to every project, blending innovative concepts with engaging designs. My freelancing background has taught me how to solve complex problems independently, while my university work has strengthened my ability to collaborate effectively in team settings.

I pay close attention to detail—it's essential in web and graphic design. I also adapt quickly to new technologies and design trends, which keeps my work current and relevant. Managing client relationships has been central to my career, whether freelancing or working at the university. I've learned to listen carefully to what clients need and deliver solutions that fit.

I'm committed to continuous learning. The web design field evolves constantly, and I make it a priority to stay updated with the latest trends and best practices.
